Issue #02

TURBINES

Project funded by LIFE
LIFE22-CCM-ES-LIFE TURBINES

This second edition of the LIFE TURBINES newsletter brings together the project's most notable moments from July to November 2025. As we approach the end of the year, the LIFE TURBINES consortium proudly looks back on a period marked by progress, recognition, and connection. From receiving European nominations to taking part in leading industry forums, these months have reaffirmed our commitment to transforming the way cities think about energy and water.

Participation at ECOMONDO 2025

LIFE TURBINES was proudly showcased at ECOMONDO 2025 in Rimini, presenting at the European Commission Stand alongside other leading EU-funded initiatives, as well as joining a fruitful session on water management. The event was a key opportunity to strengthen collaboration with other projects.

4th Coordination Committee in Rimini

The project consortium met in Rimini for its General Assembly Coordination Committee. Partners reviewed project progress and outlined next steps toward the project's final stage, reaffirming their shared commitment to advancing sustainable energy recovery in urban water systems.

AEIOLUZ Educational Workshops

Over the past months LIFE TURBINES stepped up local engagement across Valencia province with a series of community and school activities led by partner AEIOLUZ, which bring the project's concept into practical conversations about energy efficiency, citizen participation and local renewables.

Shortlist and feature at Water Innovation Europe Awards

We are proud that LIFE TURBINES was shortlisted for the Technology & Infrastructure Award at WEI 2025 in Copenhagen, a clear endorsement of our approach to hydropower. Our presence at the event allowed engagement with innovators across Europe, opening new channels for collaboration.

Showcasing at the 6th Jornada Cat CC in Valencia

In early October, Global Omnium attended UPV, where LIFE TURBINES was presented by Teresa Oltra within the “Water & Waste” session. The day closed off with the round table “Challenges and opportunities within climate change adaptation in cities”, with the participation of Marián Serrano.

LIFE TURBINES Presented at EWRA 2025

Global Omnium presented LIFE TURBINES at the EWRA 2025 World Congress in Palermo, sharing lessons from our case studies and contributing to conversations on resilient water management, connecting with international researchers to position hydropower as a solution for sustainable cities.

Feature on RNE “Alianza 2030”

LIFE TURBINES reached a national audience when María Pedro-Monzonís and Carmen Sánchez-Guevara represented the project on RNE’s radio programme “Alianza 2030”, discussing our technical approach and the wider potential of recovering energy from water networks.

About LIFE TURBINES

LIFE TURBINES is an EU-funded project demonstrating how urban drinking water networks can become a new source of clean, renewable energy. By installing micro-turbines in existing water distribution systems, we capture excess pressure to generate electricity without affecting water quality. Together, we work to reduce carbon emissions, improve energy efficiency, and promote replicable models for sustainable and decarbonised cities across Europe.
